

DM-SWS MECHANICAL & THERMAL PROTECTION

Self closing braided wrap sleeve

Applications

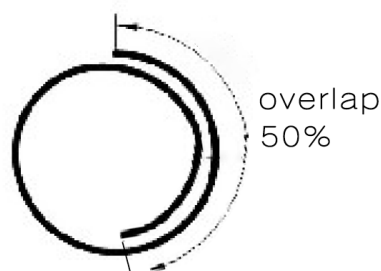

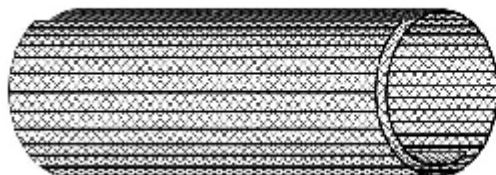

Most commonly used over wire harnesses, cable assemblies, tubing and hose to provide a tough, durable protection and reduce noisy in the automotive, railway , machinery industry etc.

Features

weaved by Polyester monofilament and polyester multifilament , this special structure offers excellent reducing for noise .Side-entry design makes it easy to install, remove and reuse for wire harnesses or cables ,especially where it is installed in hard to reach areas such as door panels or dashboards. This kind of wrap achieves the same protection function as other common expandable braided products.

Technical data

Material	PET monofilament and multifilament
Operating range	-50°C±150°C
Melt point	240±10°C
Certificate	ROHS, Halogen free
