

DC-SC(R) CONNECTORS & TERMINALS

Heat shrink half insulated ring terminals

Applications

Heat Shrinkable terminals provide a permanent environmental seal. The polymer used in the production of the heat shrink tube is specially adapted to be sealed. Ideal for electrical equipment repairs, maintenance and outdoor electrical cabling.

Features

1. Maximum Electric Rating: 150 °C 600V
2. Maximum Electric Current:
22-16 AWG/0.5-1.5mm²: 19A;
16-14AWG/1.5-2.5 mm²: 27A;
12-10AWG/4-6mm²: 48A
3. Terminal Body: Brass
4. Insulation: Heat Shrink Tube
5. Plating: Tin
